Full-Stack Developer (m/f/d) – Python/Django/React/Typescript

Description

We are looking for a passionate Full-Stack Developer to join us in our mission! About one in two people will face a cancer diagnosis during their lifetime. The gold standard for diagnosing is the examination of tissue samples in pathology labs. However, there is an ever-increasing capacity bottleneck. We develop our groundbreaking AI solution to counter this trend. Join our team to secure the cancer diagnostics of tomorrow!

Responsibilities

In collaboration with our developers and designers, you will be working on our web application Vistaneos to bring digital solutions and AI into pathology labs. Here, you bring in your knowledge about Python Django for the backend and React/Typescript for the frontend to build user-friendly and efficient web applications with our team while gaining hands-on experience in cutting-edge technologies.

- Develop, test, and deploy new features
- Collaborate with developers and designers
- Write clean, efficient, and well-documented code
- Test and debug web applications
- Optimize and maintain existing code

Qualifications

Ideally, you will have the following experience:

- Completed training or university degree in Computer Science or related fields
- Strong knowledge of programming fundamentals, including data structures and algorithms
- Experience with Python and JavaScript
- Familiar with HTML, CSS, and React / Typescript
- Experience with databases
- Familiar with Git and Agile development
- Problem-solving skills and attention to detail
- Excellent communication and collaboration skills
- Willingness to learn new technologies

Do not hesitate to apply even if you do not meet all the requirements listed!

Job Benefits

- Work remotely or in our office in the modern DHI NEOS building near the University of Bremen
- Flexible time schedule, including four-day week
- Be an integral part of an innovative, science-based start-up, with members from Cuba and Germany
- Work in an environment that tackles cutting-edge technologies – and has great access to medical professionals
